STICKY MATS

Sticky mats at the entrance to controlled environment areas have become an indispensable tool. They have proven themselves both in microelectronics as in aerospace, optics, pharmaceutical industry, hospitals and other.

A sticky mat consists of a set of polyethylene sheets specially treated so as to capture all contamination from staff soles or cart wheels.

As soon as the top sheet is contaminated, simply remove it and thus discover a new clean sheet ready for use.

The sheets are numbered in descending order from 30 to 1 in order to provide for the carpet replacement.

References	Color	Sizes (mm)	Packaging
ST ADS 1836-8	WHITE OR BLUE	457 X 900	8 mats / 30 sheets = 240 sheets per case
ST ADS 1845-8		457 X 1150	
ST ADS 2645-8		600 X 1150
